

STAR DISPENSER FOR BEVERAGE PRODUCTS

The Star dispenser is designed to dispense two similar or different beverage products at a time. It is very accurate and reliable. There are two buttons to both beverages so you can get two different amounts, small and large. And because of the compact construction and the full color information display the system is easy to use.

The dispenser saves time because it will speed up dispensing considerably. And there is automatic product line cleaning process which is monitored in the display. Product quality stays as good due to regular cleaning intervals.

You can save waiter information and sales figures of the beverage products and you can follow up the several datas. You can connect the dispenser to the large systems where the sales figures and the other settings can store on the computer.
